

*Corrugator
Roll
Lubricant*

*Oil Mist Substitute that Provides More
Benefits than Oil!*

In response to health and environmental issues, Corrugated Chemicals created **FLUTE FORM**® to replace oil used to lubricate the corrugator rolls. It solves problems such as: oil spots on the sheets, carbonizing in the singlefacer slots, carcinogenic vapors, and oil going down the drains. **FLUTE FORM**® is composed of several organic compounds, which are environmentally friendly and does not contain petroleum or wax based products.

Not only does **FLUTE FORM**® solve the health and environmental issues, customers report improved flute formation, a reduction in high/low, and extended roll life.

Benefits

- Improved Flute Formation
- Better Medium Release from Corrugator Rolls
- Reduces Potential for High/Lows
- No Harmful Carcinogenic Vapors
- Environmentally Safe Wash-Up
- No Carbonizing in the Corrugated Roll Slots
- Eliminates Oil Spots on Corrugated Sheets
- Extends the Life of Corrugator Rolls
- Does Not Contain Wax
- FDA Approved

Application

FLUTE FORM® can be used in existing oil misters or with Corrugated Chemicals' FLUTE FORM® Spray System
