

Anti-skid Coatings

The Complete Solution to Anti-Skid Coatings!

ULTRA-GRIP[®] is an anti-skid coating that yields excellent slide angle results. Because **ULTRA-GRIP**[®] clings tightly to the paper and is one of the least abrasive coatings on the market it continues to provide high slide angle results after multiple tests.

Our alumina based anti-skid coatings are non-toxic and provide a tough, invisible coating that will not impact print quality. They are typically easier to clean up than silica products, and react well to color indication.

Benefits

- Provides High Slide Angles
- Will Not Affect Printing
- Cleans Easily
- Allows Flexibility in Dilution ratios
- Does Not Contain Silica
- Slide Angles Remain After Multiple Tests

Additional Benefits

- Remains Sprayable for Six Months
- Low Abrasion
- FDA Approved
- Low pH
- Invisible Coating
- Excellent Response to Indicator Spray

ULTRA-GRIP[®] RTU

Corrugated – Alumina – Pre-diluted for simple application

ULTRA-GRIP[®] LS

Corrugated – Alumina – designed for customers with anti-skid applicators that can dilute. The slide angles can range up to the low 30's.

ULTRA-GRIP[®] 20

Corrugated – Alumina – designed for customers with anti-skid applicators that can dilute. Slide angles can range up to the mid-30's.

ULTRA-GRIP[®] CP

Corrugated – Alumina – provides excellent results on critical boxes requiring high slide angles. CP can be run at higher dilution rates than **ULTRA-GRIP**[®] LS giving the same slide angles at a lower cost. Slide Angles range to the high 30's.
